English:

Sheeksha D. Joyseeree

Summary

Highly versatile AI & Data professional with experience in machine learning, computer vision and full-stack development. Proficient in creating end-to-end AI solutions, including multi-agent LLM workflows, face verification systems, and geospatial deep learning models deployed across modern cloud platforms. Bringing a unique combination of analytical problem-solving, hands-on ML/Deep Learning expertise, and customer-facing technical support leadership, with proven experience in triaging issues, improving processes, and delivering scalable engineering solutions. Known for delivering scalable solutions, improving operational workflows, and leading technical initiatives with autonomy and innovation.

Experience

Profile Group Of Companies - Team Lead - Bilingual Background Screening

Toronto, ON

04/2024 - Current

- Led bilingual (EN/FR) operations team to manage client onboarding, escalations, and service delivery within defined SLAs.
- Conducted monthly team meetings to analyze performance metrics and establish operational targets.
- Participated in leadership meetings to review budgets and departmental goals, identifying workflows for automation.
- Integrated AI-driven automation into workflows, enhancing decision-making and reducing manual workload.
- Designed multi-step verification flows for data validation, identity checks, and escalation rules.
- Authored and maintained technical documentation, workflow diagrams, and troubleshooting guides for internal teams.

LEFINTECH LTD - Full Stack Web Developer

Mauritius

01/2023 - 01/2024

- Developed and maintained Facebook Messenger chat APIs to support online ordering and delivery.
- Created front-end and back-end components for WhatsApp API-driven e-commerce platform.
- Conducted NLP research and implemented LLMs for customer interactions in Mauritian Creole.
- Automated workflows and integrated intelligent systems into business applications.
- Produced comprehensive GitHub documentation, user guides, installation procedures, and release notes.
